

Below are the End of day forecast chart comparisons with Real-Time movement for the month of October 2024. Price is not part of our prediction. The Black line indicates our predicted trend with key turning dates. All the forecast charts were prepared well in advance.

Bank Nifty Daily Forecast

Axis Bank Daily Forecast

SBI Daily Forecast

October 2024

Over the next two months, starting from September 2024, even minor factors are expected to cause a decline in the Nifty index. While I cannot predict specific news events in advance, I can forecast this downturn by analyzing mathematical correlations between past and future market cycles. This particular heavyweight stock is likely to follow the Nifty's bearish trend.

Which stock is this? Answer by end of October 31, 2024
